DETAILED ACTION

1. This office action is in response to RCE filed on 4/24/2009.
2. Per Applicant request, claims 1-2, 4-5, 7-13, 15, 17, 19-24, and 29 have been amended. Claims 3, 14, 16, 25-28 and 31 have been canceled.
3. Claims 1-2, 4-13, 15, 17-24, and 29-30 are allowed.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in communication with Michael B. Dodd (Reg. No. 46,437) on June 1, 2009 to obviate any potential issues and to put the claims in condition for allowance.

4. The application has been amended as follows:

29. (Currently Amended) The computer program product as recited in claim ~~28-24~~, wherein altering the rewriting the order of at least one list in the first XML schema type includes placing the at least two schema components into alphabetical order.

30. (Currently Amended) The computer program product as recited in claim ~~28~~ 29, wherein prior to altering the rewriting the order, it is determined that the order of the at least two schema components is discretionary.

-end of currently amended claims-

5. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fail to teach the limitation

"identifying one or more schema components in the second schema components that can be equivalently presented in the unified schema format, identifying one or more components in the first schema components including:

identifying any discretionary components in the second schema components that are expressly recited;

identifying any discretionary components in the second schema components that are expressly omitted; and

identifying one or more list of components in the second schema components that are written in a particular order; and

rewriting the second XML schema type into the unified schema format, including a) at least one of deleting a discretionary component from the second XML schema type that as expressly recited in the second XML schema type and writing a discretionary component to the second XML schema type that was expressly omitted in the second XML schema type and b) rewriting the order of at least one list of components in the second XML schema type into a different predetermined order of the unified format;

a step for determining that the first and second normalized XML schema types are equivalent, including comparing the schema components of the first normalized XML schema type to the schema components of the second normalized XML schema type; and an act of creating a single class collectively representing both the first XML schema type and the second XML

schema type based on the determination of equivalence and notwithstanding that the representation of second schema components differ from the representation of the first schema components, the single class compatible with applications utilizing either the first XML schema type or the second XML schema type. ." as recited in independent claims 1, 10, 13 and 24.

The closest cited prior arts; USPGN 2004/0013307 by Thienot et al. teaches a method of determining if two XML schema types are equivalent via normalization. However, it does not disclose all the limitation as presented in independent claims 1, 10, 13 and 24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
